Post-doc and Ph.D. positions in Lisbon

The Department of Informatics at the Faculty of Sciences, University of Lisbon is seeking candidates for two Ph.D. or post-doc positions, starting January 2007.

The position is funded by Sensoria, Software Engineering for Service-Oriented Overlay Computers, (<http://sensoria.fast.de/>), an IST project funded by the European Union as an Integrated Project under the 6th framework programme, and part of the Global Computing Initiative. Researchers in the Lisbon site include Luís Caires, Antónia Lopes, Francisco Martins, António Ravara, João Seco, and Vasco T. Vasconcelos.

We seek candidates with a strong background in some of the following areas: service-oriented computing, software architectures, foundations and analysis of concurrent and distributed system. Monthly salary in the range €2.200–3.300.

Post-doc applicants should hold a Ph.D. degree in Computer Science or equivalent, and justified expertise on the project themes. Ph.D. candidates should be eligible for a Ph.D programme at a Portuguese university. Applications are open until December 28, 2006. Applicants should send a detailed CV, together with a contact phone number, address, and e-mail address to:

Prof. Vasco Thudichum Vasconcelos
