

Software Engineering for Service-Oriented Overlay Computers

Software Engineering for Service-Oriented Overlay Computers

The Department of Informatics at the Faculty of Sciences, University of Lisbon is seeking candidates for one post-doc position. The position is funded by Sensoria, Software Engineering for Service-Oriented Overlay Computers (<http://www.sensoria-ist.eu/>), an IST project funded by the European Union as an Integrated Project under the 6th framework program, and part of the Global Computing Initiative.

We seek candidates with a strong background in some of the following areas: service-oriented computing, software architectures, foundations and analysis of concurrent and distributed systems. The position is available from May 2009 to February 2010. Monthly salary is euro 2.775.

Applicants should hold a PhD degree in Computer Science or equivalent, and justified expertise on the project themes. Applicants should send a detailed CV, together with a contact telephone number, address, and e-mail to the address below. Further informations can be obtained by contacting the researchers on the right.
